## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 12, 15, 13, 16, 17, 18, 20, 22, 19, 21, 23, 24, 25, 26, 27, 28, 31, 32, 33, 34, 35, 37, 29, 30, 36, 38, 76, 77, 78, 74 and 75 drawn to increasing the length of carbon nanotubes.

Group II, claim(s) 39, 40, 46, 49, 47, 48, 41, 42, 45, 43, 44, 50, 52, 53, 54, 55, and 51 drawn to a composition.

Group III, claim(s) 56, drawn to a method of making a composition.

Group IV, claim(s) 56-57, drawn to methods of making a composition.

Group V, claim(s) 59-63, drawn to a composition.

Group VI, claim(s) 64, drawn to a method of removing functional groups from carbon nanotubes.

Group VII, claim(s) 65-67, drawn to a method of making a composition.

Group VIII, claim(s) 68-73, drawn to a method of making a catalyst.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The groupings outlined above lack unity *a priori* as there is no subject matter common to all groups. Likewise, the different processes are not specially adapted for the various product/composition claims in that the processes do not inherently result in the product. The

Art Unit: 1793

process claims introduce various structural features not accounted for in the product claims like chirality, diameter, etc.

Given the complexity of the restriction requirement, a telephone election was not attempted. *See* MPEP 812.01 (“However, no telephone communication need be made where the requirement for restriction is complex, the application is being prosecuted by the applicant *pro se*, or the examiner knows from past experience that an election will not be made by telephone”).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art,

Art Unit: 1793

the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
